EEG Procedure

Getting Ready and what to expect:

- The testing will take approximately 2 hours
- Please do not come with anything in your hair (hairspray, gel, wax, etc.) If you have Extensions, Weave or other hair fashions, have them removed before time of appointment or you will be rescheduled. The best hair has been washed the night before and needs to be dry.
- The technician will make 25 marks on your head and 2 on your chest, scrub each mark, and place an electrode on each mark.
- You will be lying down for about 1 hour and 30 minutes so come in comfortable clothing.
- There will be a flashing light in front of your eyes for approximately one minute.
- There will be a breathing exercise for three minutes.
- Then you will try and sleep for about 1 hour and 15 minutes
- After testing, you will be disconnected from all the electrodes. There will be paste and marks left on your head. It all washes off very easily with warm water and shampoo.

*We cannot guarantee your insurance company will cover this procedure. We do verify your insurance benefits prior to appointment, but please call your insurance company before your test and give them the procedure code 95813 to determine what you may be responsible for. Thank you.

If you for any reason you need to cancel your appointment, please do so 1 business day before your scheduled appointment. Failure to do so will result in a cancellation fee.
